

1) init kernel module

3) start userspace tool

KERNEL MODULE

USERSPACE TOOL

5) reads PID  
from signalconfpid

4)  
writes own  
PID to  
signalconfpid  
file.

2) creates files  
in debugfs  
during init

debugfs FS  
1. signalconfpid  
2. pioevents  
3. pscanevents

6) Both kernel module and userspace modules  
continue execution till time to exit.
